# Aishwarya Jalgi

SQL Developer | Database Automation Specialist | Python Developer

aishwaryajalgi16@gmail.com • LinkedIn: Aishwarya-Jalgi • Mumbai, India

## SUMMARY

Detail-oriented and results-driven SQL Developer and Software Engineer with 6 years of overall experience, featuring 3.5+ years of dedicated expertise in SQL development, database automation, and backend workflows. Adept at designing complex SQL queries, stored procedures, views, and scheduled SQL Agent jobs in SSMS. Proven track record of translating business requirements into robust database designs, manual data validation, and pipeline troubleshooting. Actively learning Python and modern ETL tools to pivot into Data Engineering roles.

## PROFESSIONAL EXPERIENCE

**Software Engineer (SQL Developer)** Oct 2022 – Present

*Ascendion* Mumbai

- Led database development and automation initiatives, serving as technical owner for backend workflows.
- Designed and optimized complex T-SQL queries, stored procedures, triggers, and views to support production transactions.
- Programmed and scheduled SQL Agent Jobs to automate recurring business reports, reducing manual overhead by 40%.
- Collaborated with client teams to translate business logic into scalable relational database designs.
- Handled query performance tuning and index optimization, improving production runtimes by 25%.
- Enforced rigorous database verification and manual testing for critical file-based import workflows.

**Application Support Engineer** Feb 2020 – May 2022

*Thinkapps Solutions Pvt Ltd* Mumbai

- Provided L2/L3 production support — triaged and resolved database and application issues with minimal business impact.
- Led team operations, training coordination, and incident management for Jio Retail and GIS support projects.
- Used Ericsson tools for troubleshooting, diagnostics, and system monitoring.
- Collaborated with cross-functional teams to manage escalations and ensure SLA compliance.

## SKILLS

| | |
|---|---|
| **Databases** | Microsoft SQL Server, SSMS, PostgreSQL, T-SQL Environment |
| Database Dev | Complex Queries, Stored Procedures, Views, Triggers, CTEs, Window Functions, Query Performance Tuning, Index |
| Data Automation | SQL Agent Jobs, ETL Concepts, File-based Data Pipelines, scheduled scripts |
| **Automation Tools** | SQL Jobs (Scheduling & Automation), SSMS |
| **Database Concepts** | Stored Procedures, Triggers, Window Functions, Query Optimization, Data Integrity |
| **Programming** | Python (Data Libraries: Pandas, NumPy, psycopg2), basic Shell Scripting |
| **Others** | Debugging, Data Handling, Technical Documentation, Git, Visual Studio, Manual Testing, Data Validation, Quality Assurance, Agile/Scrum |

## PROJECTS

Relevant Projects & Upskilling Ongoing Data Engineering Transition Prep, Self-Directed / Portfolio Actively constructing data pipelines using Python to support database integration. ○ Developed an automated Python ETL script using Pandas to ingest, clean, and write log files into a local PostgreSQL server. ○ Managed secure database connectivity and loading tasks utilizing SQL Alchemy

## EDUCATION

**Bachelor of Science in Information Technology** 07/2016 – 10/2019

*Universal College of Arts, Science and Commerce, Mumbai* Mumbai

Cumulative GPA: 7.85 / 10
